

Once you are finished with your Coastline research, complete the following questions to be turned in separately on a piece of paper.

Extension Questions regarding your Coastlines:

1. Does your coastline contain deltas, estuaries, rivers, or lagoons? If so, why are these features important to your coastline?
2. Rivers that empty into the bays and coastlines have been known to create “Dead zones” - explain what they are and how they occur.
3. What impacts will climate change have on your coastline?
4. What are the main local ocean currents that travel along your coastline? How do they impact the local marine life?
5. What is the greatest human impact to the coastlines?
6. Are there major differences between the northern and southern regions of your coastline? Describe briefly how they differ and give at least one or two sentences that explain why they are different.
